

Agenda

December 11, 2008 - Section 111 Liability (including Self-Insurance), No-Fault, and Workers' Compensation Q & A Teleconference Event

CMS is making this teleconference available to all Section 111 Liability, No-Fault, and Workers' Compensation Responsible Reporting Entities (RREs) and to others that have an interest in the Section 111 Liability, No-Fault, and Workers' Compensation data sharing process with CMS. This teleconference will focus on **Liability (including Self-Insurance), No-Fault, and Workers' Compensation Interim Record Layout and questions** arising from the ongoing implementation of the Section 111 Liability, No-Fault, and Workers' Compensation data exchange process.

At 1:00 PM CMS will open the phone lines and, after brief remarks, will begin to take questions about the Section 111 Liability (including Self-Insurance), No-Fault, and Workers' Compensation data exchange process. We recommend that callers review the latest edition of the Interim Record Layout posted on the Section 111 Website, and other relevant documents, prior to the start of the teleconference. CMS will be posting the latest version of Liability (including Self-Insurance), No-Fault, and Workers' Compensation Interim Record Layout before the event. Additional teleconference events are already being scheduled, to address operational and policy issues. This teleconference is not designed to be MSP 101; please focus your inquiries during this teleconference to Section 111 Liability, No-Fault, and Workers' Compensation implementation issues.

We are looking forward to your questions.
